JEREMY NATHAN MUNDAY

Professor
University of California, Davis
Department of Electrical and Computer Engineering
One Shields Avenue, Kemper Hall
Davis, CA 95616
jnmunday@ucdavis.edu
mundaylab.ucdavis.edu

EDUCATION

Harvard University — **Cambridge, MA**
PhD in Physics (Adviser: Federico Capasso) — June 2008
AM in Physics — June 2005

Middle Tennessee State University — **Murfreesboro, TN**
BS in Physics, summa cum laude — May 2003

EMPLOYMENT

University of California — **Davis, CA**
Full Professor — July 2019 – Present
ECE Vice Chair and Chair for Graduate Studies — July 2021 – June 2022

University of Maryland — **College Park, MD**
Associate Professor — July 2017 – September 2019
Assistant Professor — August 2011 – June 2017

California Institute of Technology — **Pasadena, CA**
Postdoctoral Scholar (Group of Harry Atwater) — August 2008 – August 2011

HONORS & AWARDS

IEEE Senior Member (2021)
DARPA Directors Fellowship (2020)
Optica (formerly OSA) Fellow (2020)
DARPA Young Faculty Award (2018)
Clark School Junior Faculty Outstanding Research Award – UMD (2017)
National Academy of Engineering FOE invited session organizer (2017)
Research and Scholarship Award (RASA) – UMD (2017)
NSF CAREER Award (2016)
ONR Young Investigator Program Award (2016)
OSA Adolph Lomb Medal (2015)
IEEE Photonics Society Young Investigator Award (2015)
Research and Scholarship Award (RASA) – UMD (2015)
SPIE Early Career Achievement Award (2014)
George Corcoran Award (2014)
NASA Early Career Faculty Space Technology Research Award (2012)
Minta Martin Research Award (2012)
SPIE Green Photonics Award (2012)
QFEXT09 Junior Paper Award from the European Science Foundation (2009)
National Science Foundation Graduate Research Fellowship (2005-2008)
Harvard Purcell Fellowship (2003-2004)

SPONSORED RESEARCH

Sponsored research from NSF, ONR, NASA, DARPA, and Google (totaling >$8M as PI).

JOURNAL COVERS

Work has been featured on the covers of several scientific journals including ***Nature***, ***Nano Letters***, ***ACS Photonics***, ***Advanced Materials, Advanced Energy Materials, Advanced Optical Materials, Joule***, ***Applied Physics Letters***, ***Journal of Applied Physics***, ***ACS Applied Materials & Interfaces***, ***Journal of Physics Condensed Matter***, and ***Nanotechnology***

PROFESSIONAL ACTIVITIES & SERVICES

Referee for Nature, Science, Nature Photonics, Nature Nanotechnology, Nature Materials, Nature Communications, Physical Review Letters, Physical Review A, B, D & E, Applied Physics Letters, Nano Letters, Optics Express, ACS Nano, Optics Letters, IEEE Journal of PV, Joule, etc.
Editorial board: Associate Editor for SPIE Journal of Photonics for Energy (2015-2021)
Member of Sigma Pi Sigma, APS (lifetime member), SPIE (lifetime member), OSA (lifetime member) IEEE, and MRS
Participant in NSF and DOE Panels and in workshops for DARPA, DOE, OSA, and NAE.

Mentor for UMD undergraduate Gemstone research team and high school students
University Service: IREAP Executive Committee (2012-2014), ECE Plan of Organization Review Committee (2012), ECE Facilities and Services Committee (2013), ECE's Distinguished Dissertation Fellowship Committee (2015), Paint Branch Lectureship Selection Committee (2015-2017), ECE Department Council (2015-2016), IREAP Hiring Committee (2015), ECE Salary Committee (2017-2018), ECE Faculty Search Committee (2017-2018); ECE Promotion and Tenure Committee (2018-2019), ECE Industrial Affiliates Program Committee (2019-2020), ECE Awards Committee (2019-2020), College of Engineering Faculty Safety Culture Advisory Committee (2019-2021), College of Engineering Executive Committee (2020-2021), ECE Personnel Committee (2020-2021), ECE Academic Planning Committee (2021)
Symposium Co-Organizer for Materials Research Society Spring Meeting (2013, 2014), IEEE Photovoltaics Specialists Conference (2015-2017), APS March Meeting (2016), OSA Optics and Photonics Congress on Renewable Energy and the Environment: SOLAR (2017) SPIE Optics + Photonics (2018-present)
Organizational Committee: Frontiers in Optics (2013), OSA Optics and Photonics Congress on Renewable Energy and the Environment (2014-2017), CLEO (2015-2018), IEEE Photonics Conference (2016, 2017)
International award committees: Jülicher prize for excellence (2015), SPIE Award Committee (2016-2017, 2019-Present)

GRANTED PATENTS

D. K. Fork, J. N. Munday, T. Narayan, and J. B. Murray, "Enhanced electron screening through plasmon oscillations," US Patent number 10,566,094 (2020)

J. N. Munday, "Silicon-based photodetectors with expanded bandwidth," US Patent number 10,403,781 (2019)

D. K. Fork, J. N. Munday, T. Narayan, and J. B. Murray, "Target structure for enhanced electron screening," US Patent number 10,264,661 (2019)

PATENT APPLICATIONS

J. Grandidier, D. M. Callahan, J. N. Munday and H. A. Atwater, "Whispering gallery solar cells," US Patent Application 20120060913 (2011)

Davide Iannuzzi, Jeremy N. Munday, and Federico Capasso, "Ultra-low friction configuration," US Patent Application 20070066494 (2005)

CONFERENCE PROCEEDINGS

7 **Tao Gong, Lisa Krayer**, and Jeremy N. Munday, "Hot electron detectors and energy conversion in the UV and IR," SPIE Optical Engineering + Applications, 96081C-96081C-9, San Diego, CA 9-13 August 2015

6 **Yunlu Xu,** Edo Waks, and Jeremy N. Munday, "Improved Voltage Response in III-V Solar Cells Based on Engineered Spontaneous Emission," Photovoltaic Specialists Conference (PVSC), New Orleans, LA, 42nd IEEE, 14-19 June 2015

5 Elizabeth Tenysson, **Joe Garrett**, Chen Gong, Jesse Frantz, Jason Myers, Robel Bekele, Jas Sanghera, Jeremy N. Munday, Marina Leite, "Assessing Local Voltage in CIGS Solar Cells by Nanoscale Resolved Kelvin Probe Force Microscopy and Sub-Micron Photoluminescence," Photovoltaic Specialists Conference (PVSC), Denver, CO, 40th IEEE, 8-13 June 2014

4 J. N. Munday, "Designing photonic materials for effective bandgap modification and optical concentration in photovoltaics," Photovoltaic Specialists Conference (PVSC), Austin, TX, 38th IEEE, 3-8 June 2012

3 Li Tian, J. Amirloo, J. Murray, K. A. Sablon, J. Little, P. Uppal, J. Munday, M. Dagenais, "A comparison of bulk and quantum dot GaAs solar cells," Photonics Conference (IPC), 2012 IEEE , vol., no., pp.194,195, 23-27 Sept. 2012 (doi: 10.1109/IPCon.2012.6358557)

2 J. Grandidier, D. M. Callahan, J. N. Munday, Harry A. Atwater, "Photocurrent enhancement in GaAs solar cells using whispering gallery modes of dielectric nanospheres," Photovoltaic Specialists Conference (PVSC), 2011 37th IEEE, vol., no., pp.003631,003631, 19-24 June 2011 (doi: 10.1109/PVSC.2011.6185935)

1 J. N. Munday, D. M. Callahan, C. Chen, Harry A. Atwater, "Three efficiency benefits from thin film plasmonic solar cells," Photovoltaic Specialists Conference (PVSC), 2011 37th IEEE, pp.000907-000910, 19-24 June 2011 (doi: 10.1109/PVSC.2011.6186099)

INVITED CONFERENCE & PLENARY TALKS

75 Jeremy Munday, "Improving Classical and Quantum Devices With Epsilon-Near-Zero (ENZ) Materials." CLEO, San Jose, CA (May 2023).
74 Jeremy Munday, "Engineering quantum phenomena with epsilon-near-zero (ENZ) materials." Materials Research Society Spring, San Francisco (April 2023).
73 Jeremy Munday, "Epsilon-Near-Zero (ENZ) Materials for Novel Guided Wave Phenomena." Latin America Optics and Photonics Conference, Recife, Brazil (Aug 2022).
72 Jeremy Munday, "Controlling the Casimir effect with novel materials and geometries." Kavli Institute for Theoretical Physics Workshop on Quantum and Thermal Electrodynamic Fluctuations in the Presence of Matter: Progress and Challenges, Santa Barbara, CA (July 2022).
71 Jeremy Munday, "Engineering ultra-thin films for extreme optics and photonics." International Conference on Metallurgical Coatings and Thin Films (ICMCTF), San Diego, CA (May 2022).
70 Jeremy Munday, "Applications of Epsilon-Near-Zero (ENZ) Materials to Quantum Devices." Materials Research Society (MRS) Fall Meeting, Boston, MA and virtual (May 2022).
69 Jeremy Munday, "Materials, Optics, and Thermodynamics of Thermophotovoltaic and Thermoradiative Devices." American Physical Society (APS) March Meeting, virtual (March 2022).
68 Jeremy Munday, "Controlling the Casimir Effect Through Geometry and Optical Anisotropy." WE-Heraeus-Seminar Workshop on Fluctuation-induced Forces, online due to pandemic (Feb 2022).
67 Jeremy Munday, "Experimental investigations of Casimir-Lifshitz phenomena." KEK IPNS-IMSS-QUP Joint Workshop and hybrid (Feb 2022).
66 Jeremy Munday, "Integrated smart optoelectronics: from solar-powered windows to compact telecom devices." SPIE Photonics West, San Francisco, CA and hybrid/on-demand (Jan/Feb 2022).
65 Jeremy Munday, "Engineered Electromagnetic Screening for Increased Fusion Rates." The 51st Winter Colloquium on the Physics of Quantum Electronics (PQE), Snowbird, Utah and hybrid (Jan 2022).
64 Jeremy Munday, "Using the universe as a thermal resource for global cooling and power." NSF-sponsored virtual workshop on Thermal Issues in Climate Change (Dec 2021).
63 Jeremy Munday, "Enhancing classical and quantum effects with epsilon-near-zero (ENZ) materials." Materials Research Society Fall Meeting (Nov 2021).
62 Jeremy Munday, "Engineering Quantum Forces and Torques." American Vacuum Society 67 Virtual Meeting (Oct 2021).
61 Jeremy Munday, "Engineering the Casimir Effect Through Geometry and Anisotropy." Materials Day 2021 at Boston University: Science & Technology of the Casimir Effect (Oct 15, 2021).
60 Jeremy Munday, "The Casimir effect: how the *nothing* of vacuum became *something* in physics." APS Physics Today Webinar (Sept 30, 2021).
59 Jeremy Munday, "Hot carrier devices using novel alloys and substrates." SPIE Optics + Photonics, San Diego and Virtual Meeting (Aug 2021).
58 Jeremy Munday, "Enhanced Hot Carrier Effects Using Ultra-Thin Metal films, Alloys, And Index Near-Zero Substrates." META 2021, Virtual Meeting (July 2021).
57 Jeremy Munday, "Recent Advances and Applications of Epsilon-Near-Zero Materials: From Photodetectors and Hydrogen Sensors to Casimir Forces." Materials Research Society Spring Meeting (April 2021).
56 Jeremy Munday, "Dynamically Switchable Photonics Based on Alloyed Metal Hydrides." Materials Research Society Fall Meeting (Nov 2020).
55 Jeremy Munday, "Recent advances in the measurement of Casimir forces and torques." CMD2020GEFES conference Mini-colloquium on "Casimir Effect and Heat Transfer Advances" Meeting (Sept 2020).
54 Jeremy Munday, "Hot electrons and radiative cooling – paths to a greener planet." SPIE Optics + Photonics, San Diego, CA (Aug 2020)
53 Jeremy Munday, "Using Deep Space to Produce Power and Cooling." OSA Advanced Photonics Congress, Virtual Meeting (July 2020).
53 Jeremy Munday, "Using photonics to power and cool the planet." Photonics North, Virtual Meeting (May 2020).
52 Jeremy Munday, "Metal Hydrides as a Platform for Reconfigurable Photonic and Plasmonic Elements." Materials Research Society Meeting, Boston, MA (Nov 2019).
51 Jeremy Munday, "Recent measurements of Casimir forces and torques." SPIE Optics + Photonics, San Diego, CA (Aug 2019)
50 Jeremy Munday, "Active photonic elements using metal hydrides." SPIE Optics + Photonics, San Diego, CA (Aug 2019)
49 Jeremy Munday, "Recent measurements of Casimir forces and torques." PIERS 2019 (Progress In Electromagnetics Research Symposium), Rome, Italy (June 2019).

48 Jeremy Munday, "Enhanced Hot Carrier Effects in Ultra-thin Metallic Films on Index Near-Zero Substrates." Materials Research Society Meeting, Phoenix, AZ (April 2019).
47 Jeremy Munday, "New optoelectronic device functionality based on light trapping." SPIE Defense & Commercial Sensing, Baltimore, Maryland (April 2019)
46 Jeremy Munday, "The Future of Green Power Generation." Invited tutorial for the GERA Energy Workshop at the March APS Meeting, Boston, MA (March 2019)
45 Jeremy Munday, "Improved solar energy conversion devices using photon recycling and hot carrier extraction." SPIE Photonics West, San Francisco, CA (February 2019)
44 Jeremy Munday, "Effect of Surface and Bulk Defects on Hot Carrier Transport in Ultra-thin Metallic Films." Materials Research Society Meeting, Boston, MA (Nov 2018).
43 Jeremy Munday, "Radiation pressure on microcantilevers and for solar sail applications." SPIE Optics + Photonics, San Diego, CA (Aug 2018)
42 Jeremy Munday, "Measurements of the Casimir force between two spheres." SPIE Optics + Photonics, San Diego, CA (Aug 2018)
41 Jeremy Munday, "Casimir Force Measurements between Two Spheres." PIERS 2018 (Progress In Electromagnetics Research Symposium), Toyama, Japan (Aug 2018).
40 Jeremy Munday, "Optical-to-electrical Energy Conversion Using Hot Carriers and Photon Recycling." PIERS 2018 (Progress In Electromagnetics Research Symposium), Toyama, Japan (Aug 2018).
39 Jeremy Munday, Joseph Garrett, and David Somers, "Tailoring Casimir forces and torques." Autumn Meeting of the Brazilian Physical Society, Foz do Iguaçu, Brazil (May 2018).
38 Jeremy Munday, "Optoelectronic devices based on hot carriers in ultrathin metallic films." PIERS 2017 (Progress In Electromagnetics Research Symposium), Singapore (Nov 2017).
37 Jeremy Munday, "Switchable optical materials for space propulsion and attitude control." SPIE Optics + Photonics, San Diego, CA (Aug 2017).
36 Jeremy Munday, "Optoelectronic metasurfaces." META'17 (The 8th International Conference on Metamaterials, Photonic Crystals and Plasmonics), Incheon, Korea (July 2017).
35 Jeremy Munday, "Casimir force and torque experiments beyond the sphere-plate configuration." Workshop on the Casimir force and optical tweezers at the Jussieu site of Laboratoire Kastler-Brossel, Paris, France (July 2017).
34 Jeremy Munday, "Hot carrier optoelectronic devices based on ultra-thin metallic films." PQE-2017 (Physics of Quantum Electronics), Snowbird, UT (Jan 2017).
33 Jeremy Munday, "Tunable photonic elements for solar energy." Materials Research Society Meeting, Boston, MA (Dec 2016).
32 Jeremy Munday, "Hot Carrier Photodetectors." International Semiconductor Device Research Symposium (ISDRS), Bethesda, MD (Dec 2016).
31 Jeremy Munday, "Solar energy generation and photon detection using hot carriers in metals." ACS (American Chemical Society) Southwest Regional Meeting, Galveston, TX (Nov 2016).
30 Jeremy Munday, "Green Solutions for Next Generation Photovoltaics: Using Wood, Glass, and Aluminum." PRiME-ECS (Electrochemical Society) meeting, Honolulu, HI (Oct 2016).
29 Jeremy Munday, "Using Simulations to Guide Experiments." PIERS 2016 (Progress In Electromagnetics Research Symposium), Shanghai, China (Aug 2016).
28 Jeremy Munday, "Plasmonic materials for hot carrier devices." META'16 (The 7th International Conference on Metamaterials, Photonic Crystals and Plasmonics), Malaga, Spain (July 2016).
27 Jeremy Munday, "Casimir forces and torques: recent experimental progress and the effect of patch potentials." IAS Focused Program on Casimir and van der Waals Physics: Progress and Prospects, Hong Kong (April 2016).
26 Jeremy Munday, "Hot carrier effects in nanostructured metals for solar-energy conversion." SPIE Photonics West, San Francisco, CA (Feb 2016).
25 Jeremy Munday, "Solar Power Conversion Efficiency >30% Using Novel Optical and Plasmonic Structures." EMN, Las Vegas, NV (Nov 2015).
24 Jeremy Munday, "Hot electron detectors and energy conversion in the UV and IR." SPIE, San Diego, CA, (Aug 2015).
23 Jeremy Munday, "Anti-reflection coatings based on cellulose paper." Photonics North, Ottawa, CA (June 2015).
22 Jeremy Munday, "Energy Conversion Using Resonant and Non-Resonant Optical Structures." Materials Research Society Spring Meeting, San Francisco, CA, (March 2015).
21 Jeremy Munday, "All-metal solar energy conversion devices based on hot electrons." TMS 2015 144th Annual Meeting and Exhibition, Orlando, FL, (March 2015).
20 Jeremy Munday, "Micro- and nano-scale optics for solar cells." EMN Meeting on Photovoltaics, Orlando, FL, (Jan 2015).
19 Jeremy Munday, "Nanoscale Optics and the Shockley-Queisser Limit." OSA Incubator on the

Fundamental Limits of Optical Energy Conversion, Washington DC, USA, (Nov 2014).

18 Jeremy Munday, "Photonic Architectures for Beating Light Trapping and Efficiency Limits in Solar Cells." Progress In Electromagnetics Research Symposium (PIERS), Guangzhou, China, (Aug 2014).

17 Jeremy Munday, "The Detailed Balance Efficiency Limit for Nanowire Solar Cells." Materials Research Society Fall Meeting, Boston, MA, (Dec 2013).

16 Jeremy Munday, "New Opportunities for PV Optics Using Quantum Dots, Nanowires, and Photonic Crystals." OSA's Optics and Photonics Congress on Renewable Energy and the Environment, Tucson, Arizona, (Nov 2013).

15 Jeremy Munday, "Light Trapping Principles and Limits for Photovoltaics." OSA's Optics and Photonics Congress on Renewable Energy and the Environment, Tucson, Arizona, (Nov 2013).

14 Jeremy Munday, "Solar innovations for a *bright* future." ASEI convention on "Innovative technologies: An engine for economic growth," College Park, MD, (Sept 2013).

13 Jeremy Munday, "Photonics and plasmonics for solar energy." Emerging Information and Technology Association – Young Investigators Conference (EITA-YIC), Cambridge, MA (Aug 2013).

12 Jeremy Munday, "Radiation pressure on nanostructured optical materials." International Conference on Computational & Experimental Engineering and Sciences, Seattle, WA (May 2013).

11 Jeremy Munday, "Photonic and plasmonic solar energy conversion." SPIE Defense, Security, and Sensing Conference, Baltimore, MD (April 2013).

10 Jeremy Munday, "Making waves." American Association of Physics Teachers Meeting (Tennessee Section), Murfreesboro, TN (March 2013).

9 Jeremy Munday, "Design and fabrication of ultrathin plasmonic solar cells." Gordon-Kenan Research Seminar (GRS), Waterville, ME (2010).

8 Jeremy Munday, "Measurement of Attractive and Repulsive Casimir Forces and Applications to Nanomechanics." Optical Society of America's Frontiers in Optics, San Jose, CA (2009).

7 Jeremy Munday, "Engineering the Casimir-Lifshitz force for levitation, ultra-low static friction devices, self-sorting, and QED torques AFM measurement of long-range quantum forces." New Frontiers in Casimir Force Control, Santa Fe, NM (2009).

6 Jeremy Munday, "Engineering the Casimir-Lifshitz force for levitation, ultra-low static friction devices, self-sorting, and QED torques." QFEXT09: Quantum Field Theory Under the Influence of External Conditions, Norman, OK (2009).

5 Jeremy Munday, "AFM measurement of long-range quantum forces." SPIE Optics and Photonics, San Diego, CA (2009).

4 Jeremy Munday, "Measurements of the Casimir force with application to nanotechnology." KITP Program: The Theory and Practice of Fluctuation-Induced Interactions, Santa Barbara, CA (2008).

3 Jeremy Munday, "Casimir-Lifshitz forces and QED torques." KITP Program: The Theory and Practice of Fluctuation-Induced Interactions, Santa Barbara, CA (2008).

2 J. N. Munday, "Measurements of the Casimir force in fluids: from attraction to repulsion." 38th Winter Colloquium on the Physics of Quantum Electonics, Snowbird, Utah (2008).

1 J. N. Munday, Federico Capasso, and Davide Iannuzzi, "Experiments for the detection of quantum electrodynamical torques and repulsive forces." Dispersion Forces and Nano-Electro-Mechanical Systems Conference at the Lorentz Center in Leiden, NL (2006).

SEMINARS & COLLOQUIA

53 **Univ. Federal de Pernambuco,** Physics Colloquium, Recife, Brazil (2023)

52 **Univ. Federal de Pernambuco,** Optics Seminar, Recife, Brazil (2023)

51 **University of California Davis**, Materials Science and Engineering Seminar, Davis, CA (2020).

50 **University of California Davis**, Energy Bites Seminar, Davis, CA (2020).

49 **Ottawa University**, Quantum Photonics Seminar, Ottawa, Canada (May 2019).

48 **University of New Mexico**, Department of Physics and Astronomy Colloquium, Albuquerque, NM (March 2019).

47 **University of Pennsylvania**, ESE Colloquium, Philadelphia, PA (Feb 2019).

46 **City University of New York, ASRC**, Photonics Seminar, New York City, NY (2018).

45 **University of California Davis**, ECE Seminar, Davis, CA (2018).

44 **University of Pennsylvania**, ESE Colloquium, Philadelphia, PA (2018).

43 **University of British Columbia**, Vancouver, Canada (2018).

42 **University of Southern California**, Los Angeles, CA (2018).

41 **Caltech**, Pasadena, CA (2017).

40 **UCLA**, Los Angeles, CA (2017).

39 **Columbia University**, New York City, NY (2017).

38 **Laboratory for Physical Sciences**, College Park, MD (2017).

37 **UC Irvine.** CaSTL (Center for Chemistry at the Space-Time Limit) Seminar, Irvine, CA (2016).
36 **Univ. of Maryland, Baltimore County.** Physics Colloquium, Baltimore, MD (2016).
35 **Rutgers University.** Laboratory for Surface Modification (LSM) Seminar, Newark, NJ (2016).
34 **NASA Marshall Space Flight Center**, Huntsville, AL (2016)
33 **Univ. of Maryland**, CNAM Colloquium, College Park, MD (2016)
32 **NASA Langley Research Center**, Hampton, VA (2015)
31 **Univ. of Maryland**, NSF TREND seminar, College Park, MD (2015)
30 **The Clark School Engineering Sustainability Workshop**: Engineering Grid Resiliency for a Changing Climate, College Park, MD (2015)
29 **Ottawa University**, Ottawa, Canada (2015)
28 **McGill University**, Montreal, Canada (2015)
27 **Hong Kong University of Science and Technology**, Hong Kong, China (2014)
26 **NASA Marshall Space Flight Center**, Huntsville, AL (2014)
25 **NASA Goddard**, Greenbelt, MD (2014)
24 **Rutgers University.** Nanotechnology for Clean Energy IGERT Seminar, Newark, NJ (2013).
23 **San Diego State University.** Department of Physics, San Diego, CA (2013).
22 **Sandia National Laboratory.** Nanoelectronics & Nanophotonics Group, Livermore, CA (2013).
21 **Santa Clara University.** Department of Mechanical Engineering, Santa Clara, CA (2013).
20 **UC San Diego.** Department of Electrical and Computer Engineering, San Diego, CA (2013).
19 **Univ. of Miami.** Department of Electrical and Computer Engineering, Miami, FL (2013).
18 **Univ. of Maryland.** Department of Material Science and Engineering, College Park, MD (2012).
17 **Univ. of Maryland.** Department of Chemistry and Biochemistry, College Park, MD (2012).
16 **The Clark School Engineering Sustainability Workshop**: Focus on Solar Energy, College Park, MD (2012).
15 **Joint Quantum Institute.** College Park, MD (2012).
14 **U.S. Naval Research Laboratory**, Washington, DC (2012).
13 **DC-Chapter IEEE Photonics Society**: Plenary Session on Forefront applications and developments in plasmonics, College Park, MD (2011).
12 **Laboratory for Physical Sciences**, College Park, MD (2011).
11 **UCLA.** IEEE Photonics Society LA Chapter, Los Angeles, CA (2011).
10 **UC Santa Barbara.** Department of Electrical and Computer Engineering, Santa Barbara, CA (2011).
9 **Boston College.** Department of Physics, Chestnut Hill, MA (2011).
8 **Univ. of Maryland.** Department of Electrical and Computer Engineering, College Park, MD (2011).
7 **Arizona State University.** Department of Physics, Tempe, AZ (2011).
6 **Univ. of Delaware.** Department of Physics, Newark, DE (2011).
5 **Universidade Federal de Pernambuco.** Department of Physics, Recife, Brasil (2010).
4 **Defense Science Research Council**: Physics and Applications of "Black" Materials Special Topic Workshop (2010).
3 **UC Irvine**. Physics Seminar, Irvine, CA (2009).
2 **Yale University**. Atomic Physics Seminar, New Haven, CT (2008).
1 **Harvard University**. Squishy Physics Seminar, Cambridge, MA (2007).

OTHER TALKS

43 Jeremy Munday, "Applications of Epsilon-Near-Zero (ENZ) Materials to Quantum Systems." Materials Research Society Fall Meeting (Nov 2022).
42 Jeremy Munday, "Tailoring Thermal Emission with Ultrathin Films." Materials Research Society Fall Meeting (Nov 2022).
41 Jeremy Munday, "Metal Optoelectronics: Hot Carrier Devices Using Novel Materials and Substrates." Materials Research Society Fall Meeting (Nov 2020).
40 Jeremy N. Munday, "Measuring the Casimir torque," APS March Meeting, Boston, MA (2019).

GRANTS AND CONTRACTS

23 Title: Quantifying Nuclear Reactions in Metal Hydrides at Low Energies
Sponsor: ARPA-E
Date: June 2023 – Dec 2025
Amount: **$1,591,753 (UCD's share $560,204)**
Role: **co-PI**

22 Title: The Casimir Torque Thruster
Sponsor: Limitless Space Institute
Date: Jan 2023 – Dec 2023
Amount: **$50,000**
Role: **PI**

21 Title: Engineering Quantum Fluctuations with Epsilon-Near-Zero Materials (Phase 3 and 4)
Sponsor: DARPA
Date: July 2022 – June 2025
Amount: **$2,267,785**
Role: **PI**

20 Title: Interdisciplinary Research Catalyst
Sponsor: Faculty Fellows Program - UCD/LBNL Partnership
Date: April 2022 – Oct 2022
Amount: **$25,000**
Role: **PI**

19 Title: Materials for ultra-high temperature photonics
Sponsor: DARPA
Date: Oct 2020 – April 2022
Amount: **$954,233**
Role: **PI**

18 Title: Engineering Quantum Fluctuations with Epsilon-Near-Zero Materials (Phase 1 and 2)
Sponsor: DARPA
Date: May 2020 – March 2022
Amount: **$679,114**
Role: **PI**

17 Title: DARPA Directors Fellowship
Sponsor: DARPA
Date: July 2020 – July 2022

Amount: **$63,372**
Role: **PI**

16 Title: Solar Cruiser (Phase A)
Sponsor: NeXolve subcontract for NASA SBIR Phase III Research
Date: December 2019 – September 2020
Amount: **$50,000**
Role: **PI**

15 Title: Controlling the Casimir Torque
Sponsor: National Science Foundation
Date: September 2018 – September 2022
Amount: **$240,000**
Role: **PI**

14 Title: Engineering the Quantum Vacuum
Sponsor: DARPA Young Faculty Award
Date: June 2018 – June 2020
Amount: **$500,000**
Role: **PI**

13 Title: Project Terrapin (supplement)
Sponsor: Google, Inc
Date: January 2018 – December 2018
Amount: **$250,000**
Role: **PI**

12 Title: A novel approach to solar energy harvesting
Sponsor: UMD, Tier 1: Proof of Concept/Seed Grant Program
Date: July 2017 – June 2018
Amount: **$50,000**
Role: **PI**

11 Title: Novel optoelectronic materials for hot carrier effects
Sponsor: Office of Naval Research Young Investigator Program
Date: June 2016 – May 2019
Amount: **$510,000**
Role: **PI**

10 Title: CAREER: Integrated Research and Education on Hot Carrier Effects in Plasmonics
Sponsor: National Science Foundation
Date: January 2016 – December 2020
Amount: **$500,000**
Role: **PI**

9 Title: Project Terrapin
Sponsor: Google, Inc
Date: January 2016 – December 2017
Amount: **$941,687**
Role: **PI**

8 Title: Propellantless attitude control of solar sail technology utilizing reflective control devices
Sponsor: NASA
Date: September 2015 – September 2017
Amount: **$200,000**
Role: **PI**

7 Title: Vacuum fluctuation induced torque on liquid crystal molecules
Sponsor: National Science Foundation
Date: September 2015 – September 2018
Amount: **$279,307**
Role: **PI**

6 Title: Graduate School Research and Scholarship Award
Sponsor: University of Maryland
Date: June 2015 – Aug 2015
Amount: **$9,000**
Role: **PI**

5 Title: High efficiency photovoltaics through engineering spontaneous emission
Sponsor: National Science Foundation
Date: August 2013 – July 2016
Amount: **$300,180**
Role: **PI**, with co-PI Edo Waks

4 Title: Team QUANTUM SEA Sustainability Project
Sponsor: University of Maryland Sustainability Fund
Date: April 2013 – September 2014
Amount: **$5,000**
Role: **Faculty Mentor** (Undergraduate Gemstone Team)

3 Title: QUANTUM SEA: Quantum dot Usage As a New Technique to Unleash Maximum Solar Energy Absorption
Sponsor: ACCIAC Fellows in Innovation and Creativity (ACCIAC)
Date: June 2013 – September 2013
Amount: **$3,500**
Role: **Faculty Mentor** (Undergraduate Gemstone Team)

2 Title: Radiation pressure on tunable optical metamaterials for propulsion and steering without moving parts
Sponsor: NASA Space Technology Research Opportunities for Early Career Faculty (STRO-ECF)
Date: September 2012 – September 2015
Amount: **$600,000**
Role: **PI**

1 Title: Development of lightweight, high efficiency photovoltaics for solar powered aircrafts
Sponsor: Minta Martin
Date: May 2012 – April 2013
Amount: **$75,000**
Role: **PI**

TEACHING EXPERIENCE

University of California, Davis

Course evaluations are provided below for each course taught (with enrollment ≥5), normalized from 1-5, with **5 being the highest rating**. Details: "Educational Value" is obtained from students' response to the statement, "Please indicate the overall educational value of the course." "Overall Teaching Effectiveness" obtained from students' response to the statement, "Please indicate the overall teaching effectiveness of the instructor."

Fall 2022	EEC 189U- Quantum Mechanics for Engineers Enrollment: 9	**Educational Value: 4.0** **Overall Teaching Effectiveness: 4.3**

Spring 2022	EEC 289L- Advanced Photovoltaics and Green Photonics Enrollment: 7	**Educational Value: 4.2** **Overall Teaching Effectiveness: 4.4**
Winter 2022	ENG 17-Circuits Enrollment: 159	**Educational Value: 4.0** **Overall Teaching Effectiveness: 4.1**
Spring 2021	ENG 017-Circuits Enrollment: 199	**Educational Value: 4.2** **Overall Teaching Effectiveness: 4.0**
Winter 2021	EEC 248 / EMS 246 – Photovoltaics and Solar Cells Enrollment: 15	**Educational Value: 4.3** **Overall Teaching Effectiveness: 4.5**
Fall 2020	EEC 189U - Quantum mechanics for engineers Enrollment: 6	**Educational Value: 4.7** **Overall Teaching Effectiveness: 4.7**
	EEC 290 – Seminar in ECE Enrollment: 181	**Educational Value: 4.4** **Overall Teaching Effectiveness: 4.6**
Spring 2020	ENG 017-Circuits Enrollment: 132	**Educational Value: 4.3** **Overall Teaching Effectiveness: 4.1**

University of Maryland, College Park

Course evaluations are provided below for each course taught (with enrollment ≥5), normalized from 0-4, with **4 being the highest rating**. For comparison, the college-wide averages for each semester are also provided. Details: "Effective Instructor Evaluation" is obtained from students' response to the statement, "Overall, this instructor was an effective teacher." "Overall Course Evaluation" is the "Average of five administrator agree/disagree questions."

Spring 2019	ENEE498I-Solar Energy Conversation Enrollment: 16	**Effective Instructor Evaluation: 3.80** College Level Ave: 3.15 **Overall Course Evaluation: 3.84** College Level Ave: 3.24
Fall 2017	ENEE498I-Solar Energy Conversation Enrollment: 20	**Effective Instructor Evaluation: 3.57** College Level Ave: 3.12 **Overall Course Evaluation: 3.66** College Level Ave: 3.28
Fall 2017	ENEE789C-Solar Energy Conversation Enrollment: 6	**Effective Instructor Evaluation: 3.00** College Level Ave: 3.09 **Overall Course Evaluation: 3.12** College Level Ave: 3.28
Fall 2016	ENEE498I-Solar Energy Conversation Enrollment: 13	**Effective Instructor Evaluation: 3.82** College Level Ave: 3.13 **Overall Course Evaluation: 3.64** College Level Ave: 3.22
Spring 2016	ENEE380-101 Electromagnetic Theory Enrollment: 25	**Effective Instructor Evaluation: 3.52** College Level Ave: 3.06 **Overall Course Evaluation: 3.60** College Level Ave: 3.22
	ENEE380-102 Electromagnetic Theory Enrollment: 25	**Effective Instructor Evaluation: 3.32** College Level Ave: 3.06 **Overall Course Evaluation: 3.45**

	ENEE380-103 Electromagnetic Theory Enrollment: 25	**Effective Instructor Evaluation: 3.39** College Level Ave: 3.06 **Overall Course Evaluation: 3.48** College Level Ave: 3.22
Fall 2015	ENEE789C-Solar Energy Conversation Enrollment: 11	**Effective Instructor Evaluation: 3.78** College Level Ave: 3.02 **Overall Course Evaluation: 3.58** College Level Ave: 3.22
Fall 2015	ENEE498I-Solar Energy Conversation Enrollment: 21	**Effective Instructor Evaluation: 3.85** College Level Ave: 3.02 **Overall Course Evaluation: 3.68** College Level Ave: 3.22
Spring 2015	ENEE380 Electromagnetic Theory Enrollment: 60	**Effective Instructor Evaluation: 3.65** College Level Ave: 3.02 **Overall Course Evaluation: 3.64** College Level Ave: 3.22
	GEMS497-Team Thesis Defense Enrollment: 14	**Effective Instructor Evaluation: 3.57** College Level Ave: 3.33 **Overall Course Evaluation: 3.31** College Level Ave: 3.23
Fall 2014	ENEE789C-Solar Energy Conversation Enrollment: 13	**Effective Instructor Evaluation: 3.90** College Level Ave: 3.03 **Overall Course Evaluation: 3.74** College Level Ave: 3.24
	ENEE498I-Solar Energy Conversation Enrollment: 10	**Effective Instructor Evaluation: 3.43** College Level Ave: 3.03 **Overall Course Evaluation: 3.51** College Level Ave: 3.24
	GEMS496-Project Writing Seminar Enrollment: 14	**Effective Instructor Evaluation: 3.38** College Level Ave: 3.39 **Overall Course Evaluation: 3.40** College Level Ave: 3.16
Spring 2014	ENEE380 Electromagnetic Theory Enrollment: 34	**Effective Instructor Evaluation: 3.72** College Level Ave: 2.99 **Overall Course Evaluation: 3.63** College Level Ave: 3.22
	GEMS397-Team Project Seminar IV Enrollment: 14	**Effective Instructor Evaluation: 3.36** College Level Ave: 3.43 **Overall Course Evaluation: 3.52** College Level Ave: 3.37
Fall 2013	ENEE789C-Solar Energy Conversation Enrollment: 19	**Effective Instructor Evaluation: 3.38** College Level Ave: 3.07 **Overall Course Evaluation: 3.29** College Level Ave: 3.26

	GEMS396-Project Project Seminar III Enrollment: 14	**Effective Instructor Evaluation: 3.38** College Level Ave: 3.07 **Overall Course Evaluation: 3.29** College Level Ave: 3.26

Spring 2013	ENEE380 Electromagnetic Theory Enrollment: 17	**Effective Instructor Evaluation: 3.33** College Level Ave: 2.70 **Overall Course Evaluation: 3.63** College Level Ave: 3.06
Spring 2013	GEMS297-Team Project Seminar II Enrollment: 14	**Effective Instructor Evaluation: 3.29** College Level Ave: 3.31 **Overall Course Evaluation: 3.19** College Level Ave: 3.24
Fall 2012	ENEE380H Electromagnetic Theory (Honors) Enrollment: 5	**Effective Instructor Evaluation: 3.67** College Level Ave: 2.72 **Overall Course Evaluation: 3.8** College Level Ave: 3.13
	GEMS296-Team Project Seminar I Enrollment: 14	**Effective Instructor Evaluation: 3.27** College Level Ave: 3.33 **Overall Course Evaluation: 3.13** College Level Ave: 3.30
Fall 2011	ENEE789C-Solar Energy Conversation Enrollment: 4	**Effective Instructor Evaluation: N/A** College Level Ave: -- **Overall Course Evaluation: N/A** College Level Ave: --

Below are brief descriptions of the courses listed.

University of California, Davis **Davis, CA**

ENG 017-Circuits: **Spring 2020, 2021, Winter 2022**

- This course covers basic electric circuit analysis techniques, including electrical quantities and elements, resistive circuits, transient and steady-state responses of RLC circuits, sinusoidal excitation and phasors, and complex frequency and network functions.

EEC 189U - Quantum mechanics for engineers **Fall 2020**

- This course provides engineering students with a basic background in quantum mechanics, enabling them to understand the fundamental concepts necessary in many cutting-edge areas of research involving nanotechnology, materials science, nanoscale devices, quantum information and computation, etc. Students are introduced to quantum mechanical wave functions and their associated mathematics and learn to apply these concepts to practical problems faced by engineers and scientists studying nanoscale phenomena.

EEC 248 / EMS 246 – Photovoltaics and Solar Cells **Winter 2021**

- This cross-listed course (ECE and Materials Science & Engineering) is designed to provide a fundamental understanding of energy conversion processes from solar illumination. Topics include traditional photovoltaic solar cells, solar thermal devices, thermodynamic limits, device physics, and the optics and photonics of such devices.

University of Maryland **College Park, MD**

ENEE789C/ENEE489I Advanced Topics in Electrophysics: Solar Energy Conversion **Fall 2014, 2015, 2016, 2017**

- This course provides a fundamental understanding of energy conversion processes from solar illumination covering thermodynamic limits, device physics, and the optics and photonics of such devices as well as future generation techniques, including multijunction and multi-exciton generation, and more speculative conversion processes, such as rectifying antennas.

GEMS496 Team Project Seminar V **Fall 2014**

- This is the fifth of six seminars during which Gemstone students carry out multidisciplinary research under the general guidance of a faculty mentor. The teams develop their working relationship, start their literature search, define their research question, and set short & long-term goals.

GEMS397 Team Project Seminar IV **Spring 2014**

- This is the fourth of six seminars during which Gemstone students carry out multidisciplinary research under the general guidance of a faculty mentor. The teams develop their working relationship, start their literature search, define their research question, and set short & long-term goals.

ENEE380 Electromagnetic Theory **Spring 2014, 2015, 2016**

- This course provides an introduction to electromagnetic fields. Coulomb's law, Gauss's law, electrical potential, dielectric materials capacitance, boundary value problems, Biot-Savart law, Ampere's law, Lorentz force equation, magnetic materials, magnetic circuits, inductance, time varying fields and Maxwell's equation.

GEMS396 Team Project Seminar III **Fall 2013**

- This is the third of six seminars during which Gemstone students carry out multidisciplinary research under the general guidance of a faculty mentor. The teams develop their working relationship, start their literature search, define their research question, and set short & long-term goals.

ENEE789C/ENEE489I Advanced Topics in Electrophysics: **Fall 2013**
Solar Energy Conversion

- This course provides a fundamental understanding of energy conversion processes from solar illumination covering thermodynamic limits, device physics, and the optics and photonics of such devices as well as future generation techniques, including multijunction and multi-exciton generation, and more speculative conversion processes, such as rectifying antennas.

GEMS297 Team Project Seminar II **Spring 2013**

- This is the second of six seminars during which Gemstone students carry out multidisciplinary research under the general guidance of a faculty mentor. The teams develop their working relationship, start their literature search, define their research question, and set short & long-term goals.

ENEE380 Electromagnetic Theory **Spring 2013**

- This course provides an introduction to electromagnetic fields. Coulomb's law, Gauss's law, electrical potential, dielectric materials capacitance, boundary value problems, Biot-Savart law, Ampere's law, Lorentz force equation, magnetic materials, magnetic circuits, inductance, time varying fields and Maxwell's equation.

GEMS296 Team Project Seminar I **Fall 2012**

- This is the first of six seminars during which Gemstone students carry out multidisciplinary research under the general guidance of a faculty mentor. The teams develop their working relationship, start their literature search, define their research question, and set short & long-term goals.

ENEE380H Honors Electromagnetic Theory **Fall 2012**

- This course provides an introduction to electromagnetic fields. Coulomb's law, Gauss's law, electrical potential, dielectric materials capacitance, boundary value problems, Biot-Savart law, Ampere's law, Lorentz force equation, magnetic materials, magnetic circuits, inductance, time varying fields and Maxwell's equation.

ENEE789C Advanced Topics in Electrophysics: **Fall 2011**
Solar Energy Conversion

- This course provides a fundamental understanding of energy conversion processes from solar illumination covering thermodynamic limits, device physics, and the optics and photonics of such devices as well as future generation techniques, including multijunction and multi-exciton generation, and more speculative conversion processes, such as rectifying antennas.

California Institute of Technology **Pasadena, CA**
Co-Lecturer for Applied Physics 183c: **Spring 2010**
Physics of Semiconductors and Semiconductor Devices

- Presented 2 1.5-hour lectures for the graduate semiconductor devices course. Course topics included Fermi energy, band-bending, carrier generation and recombination mechanisms, quasi-Fermi levels, carrier drift and diffusion transport, *p-n* junctions, metal-semiconductor contacts, MOS field effect devices, quantum transport, etc.

Co-Lecturer for Applied Physics 114b: Solid State Physics **Winter 2010**

- Presented 6 1-hour lectures for the graduate solid-state physics coarse. Topics included models for energy bandstructure, standard and low dimensional transport and scattering mechanisms, semiconductor devices, optical and electronic properties of solids, excitons, etc.

Harvard University **Cambridge, MA**
Astronomy 302: Scientists Teaching Science **Spring 2008**

- Course taken with Dr. Philip M. Sadler addressing principles for lecturing well, leading discussions, connecting to real-world applications, and creating tests in scientific disciplines while focusing on relevant educational research, case studies, and engaging in practical classroom activities

Teaching Fellow, Head Section Leader **September 2006 – January 2007**

- Head Section Leader and Teaching Fellow for Science A-49: The Physics of Music and Sound, an undergraduate class for non-science majors
- Gave lectures and demonstrations pertaining to various aspects of acoustics on a level accessible to non-science majors yet rigorous enough to expose students to main concepts of scientific analysis
- Created handouts and assisted in the construction of tests and homework assignments

Middle Tennessee State University **Murfreesboro, TN**
Teaching and Lab Assistant, Tutor **June 2000 – May 2003**

- Assisted students in both Calculus and Non-Calculus based introductory physics classes and labs (Phys 2010, 2011, 2020, 2021, 2110, 2111, 2120, 2121)
- Constructed handouts, supervised experiments and graded homework assignments
- Provided tutoring on an individual basis for classes within the department

Physics Curriculum Development Assistant **May 2000 – September 2000**

- Creation of visual aids and assisted in the general development of a non-calculus based physics course under the direction of Dr. Victor J. Montemayor (http://www.mtsu.edu/~phys2020/)

RESEARCH ADVISING AND MENTORING

Graduated Ph.D. Students

Dongheon Ha (Ph.D. in ECE awarded 5/2016)
Currently: Assistant Professor at Eastern Illinois University (EIU)
Joe Murray (Ph.D. in ECE awarded 5/2016)
Currently: Naval Research Lab
Yunlu Xu (Ph.D. in ECE awarded 8/2016)
Currently: Software system engineer at TE Subcom
Tao Gong (Ph.D. in ECE awarded 9/2016)
Currently: Software Training Engineer at MathWorks
Dakang Ma (Ph.D. in ECE awarded 12/2016)
Currently: Associate Software Engineer at Microstrategy, Inc.
Joe Garrett (Ph.D. in Physics awarded 8/2017)
Currently: Postdoc at UMD
David Somers (Ph.D. in Physics awarded 7/2018)
Currently: Boston Consulting Group
Lisa Krayer (Ph.D. in ECE awarded 11/2019)
Currently: Boston Consulting Group
Sarvenaz Memarzadeh (Ph.D in ECE awarded 5/2021)
Currently: Research Fellow at Massachusetts General Hospital/Wellman Center for Photomedicine
Kevin Palm (PhD in Physics awarded 6/2021)
Currently: Mitre

Graduated MS Students

Dan Goldman (M.S. in ECE awarded 5/2016)

Graduate Students

Tristan Deppe (UCD, ECE: 2017-present)
Ahmed Rayhan Mahbhb (UCD, ECE: 2018-present)
Calum Shelden (UCD, ECE: 2019-present)

Matthew Corrado (UCD, physics: 2019-present)
Micah Karahadian (UCD, ECE: 2021-present)
Raphaella Banholzer (UCD, ECE: 2022-present)

Undergraduate Students
Taqiyyah Safi (UMD: 2015-2016): graduate school at MIT
Paul La Rosa (UMD: 2014-2015): Lockheed Martin
Bartosz Tararuj (UMD: 2014-2015)
Patrick Giggins (UMD: 2014-2015)
Nicole Greene (UMD: 2013-2014)
Carlos Biaou (UMD: 2013-2014): graduate school at UC Berkeley
Adam Maraschky (Saint Johns College: summer 2012)
Pedro Pena (UMD: 2012-present): graduate school at UMD
Mylene Motsebo (UMD: Summer 2012)
Clare Chen (Caltech, Summer Undergraduate Research Fellowship: 2010)
Reggie Wilcox (Caltech, Summer Undergraduate Research Fellowship: 2010)
Limor Spector (Harvard University: 2006-2007)
Rachel Hillmer (UIUC, NSF REU at Harvard University: summer 2005)

UMD Gemstone Project (2012-2015)
This is a multi-year, interdisciplinary undergraduate research program for selected honors students. I am the mentor for team "QUANTUM SEA: Quantum dot Usage As a New Technique to Unleash Maximum Solar Energy Absorption." The team consists of 14 undergraduate students from a variety of disciplines. This team received two grants in 2013 to pursue solar research: (i) University Sustainability Fund grant for $5,000 and (ii) ACCIAC Fellows in Innovation and Creativity (ACCIAC) for $3,500.

High School Students
Brian Murray (Eleanor Roosevelt High School 2014-2015): UMD undergraduate
Sonia Zhang (Eleanor Roosevelt High School: 2012-2013): MIT undergraduate
Akshay Sreekumar (River Hill High School: summer 2012)

Graduate Thesis Committees
[PhD]: Filiz Yesilkoy (PhD, ECE 2012), Ryan Domenick Artuso (PhD, Physics 2012), Tamin Tai (PhD, ECE 2013), Paul Iven Jaffe (PhD, ECE 2013), Michael Sanders (PhD, Aerospace 2014), Justin Wilson (PhD, Physics 2015), Dev Ettisserry (PhD, ECE 2015), Li-Chiang Kuo (PhD, ECE 2015), Kangmook Lim (PhD, ECE 2015), Ryan Suess (PhD, ECE 2016), Daimeng Zhang (PhD, ECE 2016), Chensheng Wu (PhD, ECE 2016), Shou Sun (PhD, ECE 2016), Mehdi Jadidi (PhD, ECE 2016), Christopher Petoukhoff (PhD, Mat. Sci. & Eng. at Rutgers Univ. 2016), Yi Zhang (PhD, School of Photovoltaic & Renewable Energy Eng at UNSW 2016), Navin Lingaraju (MS, ECE 2017), Pablo Solano (PhD, Physics 2017), Shangjie Yu (PhD, ECE 2018), Aisha Alobaid (PhD, Chem Eng 2019), Lance Boyer (PhD, Physics 2019), Aaron Bass (MS, ECE 2021)

Student Awards
Sarvenaz Memarzadeh: Graduate Student Summer Research Fellowship (2020)
Kevin Palm: Best Graduate Student Seminar Speaker (Fall 2019)
Lisa Krayer: Best Graduate Student Seminar Speaker (Spring 2019)
Lisa Krayer: Ann G. Wylie Dissertation Fellowship (2018)
Kevin Palm: NDSEG Fellowship (2018)
Sarvenaz Memarzadeh: Harry K. Wells Graduate Fellowship (2018)
Lisa Krayer: UMD ECE Graduate Student Service Award (2017)
Dongheon Ha: Poster award nomination at the Fall Materials Research Society Conference (2015)
Lisa Krayer: NSF Graduate Student Fellowship (2015)
Lisa Krayer: NDSEG Graduate Student Fellowship – declined (2015)
Dongheon Ha: Graduate Dean's Dissertation Fellowship (2015)
Dongheon Ha: Ann G. Wylie Dissertation Fellowship (2015)
Dongheon Ha: Korean Graduate Student Association (KGSA) best presentation award (2015)
Joseph Garrett: Thomas Mason Interdisciplinary Scholarship (2015)
Joseph Garrett: APS FGSA Travel Award for Excellence in Graduate Research (2015)
7 students receive Goldhaber Travel Award (2015)
Dongheon Ha: Future Faculty Programs Fellow (2015)
Dan Goldman: ECE Distinguished Teaching Assistant (2014-2015)
David Somers: Best Graduate Student Speaker Award from the IREAP student seminar series (Spring 2014)

Carlos Biaou: Jack Kent Cooke Foundation Graduate Scholarship (2014)
Yunlu Xu: Honorable Mention at UMD Optics Society poster competition (2014)
Dongheon Ha: Distinguished Teaching Assistant (2012-2013)
Dongheon Ha: International Teaching Fellow (2012-2013)
Joseph Garrett: 1st place presentation in 'Pushing the Boundaries of Science' at the UMD Graduate Research Interaction Day (2013)
